

Louie Yin

Waterloo Software Engineer x Varsity Athlete

647-581-5178 | l5yin@uwaterloo.ca | [linkedin.com/in/louieyin](https://www.linkedin.com/in/louieyin) | github.com/GarfieldFluffJr

EDUCATION

University of Waterloo – Bachelor of Software Engineering September 2024 – Present

- GPA: **3.86/4.0** (equivalent 89%), **Dean's List**, **USPORTS Academic All-Canadian**
- Relevant Courses: Calculus I and II, Data Abstraction, Sequential Programs, Logic and Computation

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, C++, Scala, HTML, CSS, SQL

Frameworks & Libraries: React, Node.js, Next.js, Express.js, Astro, Tailwind.css, MySQL, PostgreSQL, MongoDB, Redis, Socket.io, Flask, Bootstrap, Prism.js

DevOps & Tools: Docker, Git, Linux, Unix, Figma, Vercel, Heroku, AutoCAD, Raspberry Pi, Claude Code

EXPERIENCE

Software Engineer

May 2025 – August 2025

Levanta Labs

Toronto, ON, CA

- Generated over **\$100,000** in company revenue over 4 months by building **10+ full-stack applications** for SaaS startups and B2B organizations
- Containerized microservices using Docker across 10+ production environments, reducing **deployment time by 50%** and eliminating environment inconsistency issues
- Optimized MySQL database performance by implementing Redis caching and server-side filtering on Express.js backends, reducing API response times by **60%** and React frontend load times by **6 seconds**
- Spearheaded the development and deployment of an interactive AI ROI Financial Calculator using Canvas API and Astro, improving the client onboarding process by **boosting engagement by 70%**

PROJECTS

[AI Cooking Assistant](#) | *Python, JavaScript, HTML, CSS*

- Processed **2+ million data points** using OpenAI Batch API to allow LLaMa fine-tuned LLM to generate recipes, reducing processing time by a **factor of 40x** and processing costs by **\$200**
- Used Flask and Websocket to build a **full-stack, voice-enabled assistant**, while integrating TTS/STT via RegEx for real-time assistant-user interaction
- Developed a **custom Raspberry Pi enclosure** using CAD, incorporating temperature and gas sensors to process cooking data while enhancing user safety

[Personal Portfolio](#) | *React, TypeScript, Tailwind.css, Node.js, Express.js, Framer-Motion*

- Built a dynamic, mobile-responsive, full-stack portfolio using React and TypeScript with automated **CI/CD workflows** via Vercel for frontend and Render for backend to my custom domain
- Created a Node.js backend server with Express.js REST api routes for email handling with Resend API
- Engineered 10+ advanced UI features such as an animated scroll-triggered dual navbar using Tailwind and Framer-Motion, achieving a **90 accessibility** and **96 best practices** scores on Google Lighthouse

HONOURS AND CERTIFICATIONS

- **Governor General's Medal of Canada** – Awarded for highest academic average in school (2024)
- **Paris 2024 Olympic Swimming Trials Qualifier**, Canadian Nationals Finalist (2024)
- **RCM Piano Level 10** – First-Class Honours (2023)
